

# INSIGHTS & ANALYTICS

For those who want to take their data insight reporting to the next level, Nourish Insights & Analytics bolt ons offer the perfect solution.

## Nourish Insights

Watch your data come to life with your suite of pre-defined dashboards built by our team here at Nourish. Our highly detailed, person-centric dashboards embedded into Nourish will equip your team with the tools to:

- Understand patterns and trends to monitor the health and wellbeing of the people you support
- Clear and visual representation of data that can be interacted with to understand the actions that needed to be taken
- Using the richness of the data to connect the dots across multiple contexts

By using this valuable information in your care operations, you will make more strategic, safer decisions, improving the lives of those you support.

“There are moments when data visualisation becomes powerful. This is one of them. Just built a report using data from our Nourish Care system that could fundamentally change how we care - it’s that powerful.”

Michael Butcher, Blackadder Corporation  
(Referring to Nourish Analytics)

## Nourish Analytics

Curated and managed data source for you to build your own reports. Nourish Analytics is a solution for care services who are looking to build their own bespoke reports by integrating data from multiple sources.

Analytics makes getting Nourish data connected to your chosen BI suite simple and straightforward. The data from Nourish is brought across onto your own secure Analytics server.

The data is live, so no long waits for refreshes and daily downloads - all your reports are right up to date. With highly detailed data at your fingertips the possibilities are endless; drive compliance, manage audit workflows and cross-reference staff interactions against HR records, the list goes on...

Nourish Insights and Nourish Analytics are not included as standard; these are features you can bolt onto your Nourish account for an additional fee.
